

A&K's Olympia Bowker to Speak at BBA Speed-Networking Environmental Law Event

On Feb. 9, 2023, Olympia "Libby" Bowker will speak at Boston Bar Association's Speed-Networking event: "Find Out What Practicing Environmental Law Is Really Like."

Participants will learn from public and private sector attorneys about the paths that led them to their career in environmental law and hear more about their practice specialties, the day-to-day reality of their work, and their advice on the skills and experience necessary to succeed in the industry. After some opening remarks, the speed-networking portion of the event will begin. Attorney participants will lead short small group discussions and rotate among the tables. A broader networking reception will follow and close the night.
