Overview

Marissa joined Anderson & Kreiger in 2022 after graduating from Northeastern University School of Law and Yale School of the Environment. During law school, she was a member of the Northeastern Environmental Law Society and Associate editor of the Northeastern University Law Review, and during her time at Yale she focused on biological oceanography, wetlands, and coastal ecosystems. Marissa has interned with the U.S. Department of Justice, Environmental and Natural Resources Division, where she worked on Clean Water Act enforcement matters; at Boston Harbor Now, where she worked on climate resilience strategies for East Boston's industrial waterfront; and at the U.S. Environmental Protection Agency's Region 1 Office of Regional Counsel, where she assisted with Superfund and Oil Pollution Act enforcement and cost recovery.

Marissa offers clients counsel and advocacy in matters involving environmental, energy, land use, airport, and administrative law. She specializes in regulatory compliance and has experience in federal and state permitting for a variety of water, energy infrastructure, and solar-related matters, as well as legislative drafting and advocacy. Marissa frequently applies her expertise in wetland, coastal, and marine ecology to the practical challenges of wetlands and waterfront permitting and the protection of conservation lands and waters.

PRACTICE AREAS

Environmental
